

Muscles, Motion 'n Touch

for Therapists

Supporting children with sensory processing and sensory motor challenges

- User friendly interactive software comes with 6 sample planners, activity key ring and quick start booklet.
- STICKIDS™ is designed for children with sensory processing, sensory integration and sensory motor challenges.
- STICKIDS™ combines and uses various frameworks of:
 - Dr. Ayres' sensory integration clinical perspective
 - sensory modulation, self regulation, sensory diet
 - cognitive motor learning
- STICKIDS™ benefits therapists:
 - Easily create and print numerous individualised and customised colour planners and activity cards.
 - 8 types to choose from including Weekly, Summary, Monthly, Group and fun activity cards and games for a single child or many children. Over 125 fun STICKIDS™ pictures.
 - Select from categories / folders: Motion, Heavy Work, Pressure 'n Touch, Suck Chew 'n Breath, Retreat, Routines 'n Planning, Tips Tools 'n Doing, and Clinic Time.
 - Allows extensive customisation for therapeutic perspective and individual child's needs, and retains changes.
 - Affordable, user friendly and a time saver - save planners as a PDF, attach to reports, fax or email.
 - Promotes child participation to plan select and follow through during therapy sessions.
 - Suitable for toddlers to teens, and for mildly to severely effected children. Also presents as a wellness model.
 - Offers methods to enhance "teaming" and extend therapeutic applications with teachers, parent and assistants.
 - Facilitates tracking progress and goals.

COMPUTER AND TECHNICAL DETAILS:

- Licensed for single site use, and requires CD in the disc drive to run program.
- Minimum requirements: Pentium 200, VGA 800x600, 64MB RAM, 200MB Disk Space. Windows 98 or newer, and colour printer.
- 90 day technical guarantee and after sales technical support.

There is also a version for parents and teachers, STICKIDS™ Home 'n School, that will support their involvement and collaboration.
